

Plugin: MySQL Input

Input plugin to use my sql queries as input and stream the output into logagent.

Features:

- run queries frequently
- choose timezone and format for query time
- use multiple SQL query statements

Applications:

- index for SQL data in elasticsearch
- create alerts based SQL data

Configuration

```
input:
  mysql-json:
    module: mysql-query
    server:
      host: 'localhost'
      user: 'root'
      password: ''
      database: 'test'
    queries:
      - sourceName: query1
        sql: SELECT * FROM potluck where signup_date < '$queryTime'
      - sourceName: query2
        sql: SELECT * FROM potluck where name = 'Tina' and signup_date < '$queryTime'
      - sourceName: query3
        sql: SELECT * FROM potluck where name = 'Sandy' and signup_date < '$queryTime'
    interval: 1
    debug: true

output:
  stdout: yaml

Start logagent

logagent --config mysql.yaml
```
