

Sematest-metrics-reporter is an extension for the Coda Hale Metrics library version 2.2.0 and 3.x for sending metrics to SPM. Under the hood sematest-metrics Java library is used to send metrics as Custom Metrics to SPM.

Quick Start

To start sending metrics just create and start SematestMetricsReporter:

```
MetricRegistry metrics = new MetricRegistry();

SematestClient.initialize("spm token here");
SematestMetricsReporter reporter = SematestMetricsReporter.forClient(SematestClient.client()
    .withFilter(MetricFilter.ALL)
    .withRegistry(metrics)
    .withDurationUnit(TimeUnit.MILLISECONDS)
    .build());

reporter.start(1, TimeUnit.MINUTES);
```
