Plugin: PostgresSQL Input

Input plugin to use PostgreSQL queries as input and stream the output into logagent.

- run queries frequently
- choose timezone and format for query time
- use multiple SQL-query statements

Applications:

- index for SQL data in elastic search
- create alerts based SQL data

Configuration

```
input:
 postgresql:
   module: postgresql-query
    server:
      user: 'postgres'
      database: 'test'
      password: '$Demo123'
      host: 'localhost'
      port: '5432'
    queryTimezone: America/Los_Angeles
    queryTimeFormat: YYYY-MM-DD HH:mm:ss
    queries:
      - sourceName: query1
     sql: SELECT name, age FROM company where join_date < '$queryTime'
      - sourceName: query2
     sql: SELECT name, salary FROM company where join_date < '$queryTime'</pre>
    interval: 1
    debug: true
output:
    stdout: yaml
Start logagent
logagent --config postgresql.yaml
```
