Plugin: Cloud Foundry input

Recieves logs from Cloud Foundry log drains via HTTP.

Please note:
To ship Cloud Foundry application logs to Logsene, we recommend to stream Cloud Foundry application logs directly to Logsene

Configuration

```
input:
  # Receive data from Cloud Foundry log drains via http
  cloudFoundry:
    port: 8888

output:
  stdout: yaml
```

Start Logagent

```
logagent --config myconfig.yml
```
